AMENDMENTS TO THE CLAIMS

1-90. (Cancelled)

91. (Currently amended) A microemulsion-forming-concentrate ~~comprising~~ consisting of a herbicide compound in acid form and at least one surfactant, wherein the concentrate can be combined with water to form a microemulsion wherein the herbicide in the acid form is 2,4-dichlorophenoxyacetic acid or dicamba acid or a mixture thereof.

92-93 canceled

94. (Currently amended) The concentrate of claim 91 ~~comprising~~ consisting of from 15 to 20 parts by weight of said herbicide compound in acid form, and from 80 to 85 parts by weight of said surfactant.

95. (Currently amended) The concentrate of claim 91 ~~comprising~~ consisting of 20 parts by weight of said herbicide compound in acid form, and 80 parts by weight of said surfactant.

96. (Previously presented) The concentrate as claimed in claim 91, wherein said surfactant is selected from the group consisting of C₁₁ alcohol (3EO) ethoxylate, nonylphenol (6EO) ethoxylate, polyoxyethylene (20) sorbitan monolaurate, C₁₁ alcohol (6EO) ethoxylate phosphate ester and mixtures thereof.

97. (Previously presented) The concentrate of claim 91 consisting of: 80 parts by weight surfactant, 20 parts by weight herbicide compound in acid form selected from the group consisting of 2,4-dichlorophenoxyacetic acid, dicamba acid and mixtures thereof.

Application No. 10/784343

98. (Currently amended) The concentrate of claim 91 wherein the concentrate ~~contains~~ consists of from about 25 to about 30 parts by weight 2,4-dichlorophenoxyacetic acid, and from about 70 to about 75 parts by weight of said surfactant selected from the group consisting of a C₁₁ alcohol (3EO) ethoxylate, C₁₁ alcohol (6EO) ethoxylate phosphate ester and mixtures thereof.
99. (Previously presented) A microemulsion comprising the microemulsion-forming-concentrate as claimed in claim 91 and water.
100. (Currently amended) A method of applying a herbicide, the method comprising: preparing the microemulsion-forming-concentrate as claimed in claim 91, diluting the microemulsion with water and then applying to a plant.
101. (Previously presented) The method of claim 100, further comprising applying the herbicide composition to a plant to control plant growth, while the herbicide compound is in acid form.
102. (Previously presented) A method of preparing the microemulsion-forming-concentrate as claimed in claim 91, the method comprising combining said herbicide compound in acid form with said surfactant, to produce a microemulsion-forming-concentrate that can be combined with water to form a microemulsion.
103. (Previously presented) A method of preparing a microemulsion, the method comprising: preparing the microemulsion-forming-concentrate as claimed in claim 91, by a method comprising combining said herbicide compound in acid form with said surfactant to produce a microemulsion-forming-concentrate that can be combined with water to form a

microemulsion, and combining the microemulsion-forming-concentrate with water to form a microemulsion.

104. (Currently amended) A microemulsion-forming-concentrate ~~comprising~~ consisting of a herbicide compound in acid form and surfactant, wherein the concentrate can be combined with water to form a microemulsion.
